

The Agency for Historical, Civic, and Media Education e.V. was founded in 2008 with the aim of promoting the online portal "Learning from History". In the meantime, the scope of activities has steadily increased. Current core objectives are the promotion of historical, political, cultural and media-supported educational work as well as the organisation of conferences, educational and information events. Furthermore, we cooperate with other didactic and specialist scientific projects and suitable publication projects. The Agency operates on a national and international level. Its focus lies on the history of National Socialism, the Holocaust, Jewish history as well as the post-war period. We also deal with global and colonial history, the general history of the 20th century and current political issues. The Agency has four full-time employees, two honorary board members and ten general members.
